Trialing of this app is FREE and DIVERGENCE ANALYSIS INC has NO visibility into any info that you may input in the app. However, upon clicking the Free Trial button above DIVERGENCE ANALYSIS INC will be notified of your name and firm and may contact you for support & training purposes.

User Guide

13) Description 14) Publisher Info 15) Support

DVAN SmartLines is a versatile group of indicator tools, providing trading signals, trend direction, momentum analysis, support/resistance levels, and identifying buying/selling cycles. Applicable on all securities and time frames, DVAN SmartLines indicators give the trader an instant reading of a security's position and provide the needed information for active trade management.

DVAN SmartLines is driven by the 25 year methodology of Divergence Analysis Inc, who has provided trading advisory services to institutions since 1989. Divergence Analysis's methodology measures underlying

Included in DVAN SmartLines App subscriber access is the DVAN Monitor App, an excel-based add-in that allows a user to upload a portfolio/watchlist of securities and screen for new signals and other conditions based on the DVAN methodology.

Using DVAN SmartLines >>>

- Load your portfolio or watchlist of securities to the DVAN Monitor
- Monitor your portfolio for new signals, support/resistance, and trend changes based on the DVAN studies
- Take a deeper-dive analysis by loading a security on a G-chart with DVAN studies enabled
- Make informed, tactical trading and investment decisions using a moneyflow methodology live in the markets since 1989

What's different about the DVAN methodology? >>>

The DVAN studies use volume and velocity-based algorithms, rather than price inputs, to generate signals, reducing market noise and identifying the true market trend.
